

# Find A Team Features

- **Filtering**

- by address (or just zip code), finder type, club excellence level and/or safe sport recognized.

- **Navigation**

- With the user's permission, the My Location button will zoom the map to the user's present location.

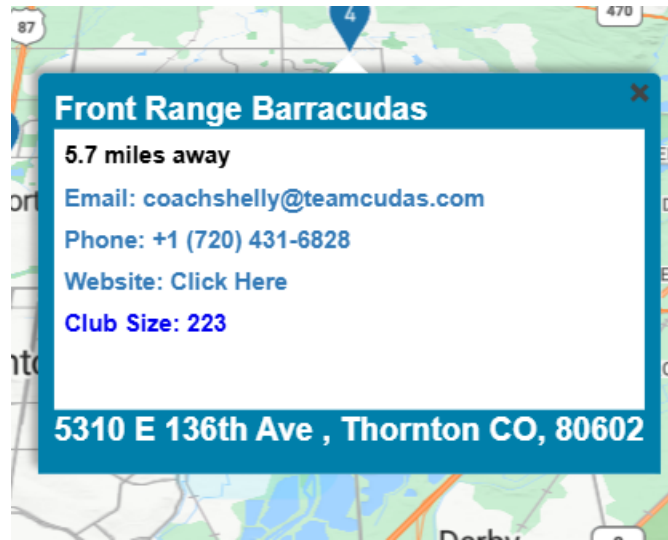

- Users can scroll, pinch zoom, or use the zoom controls to find a specific location within the US.

- **Display**

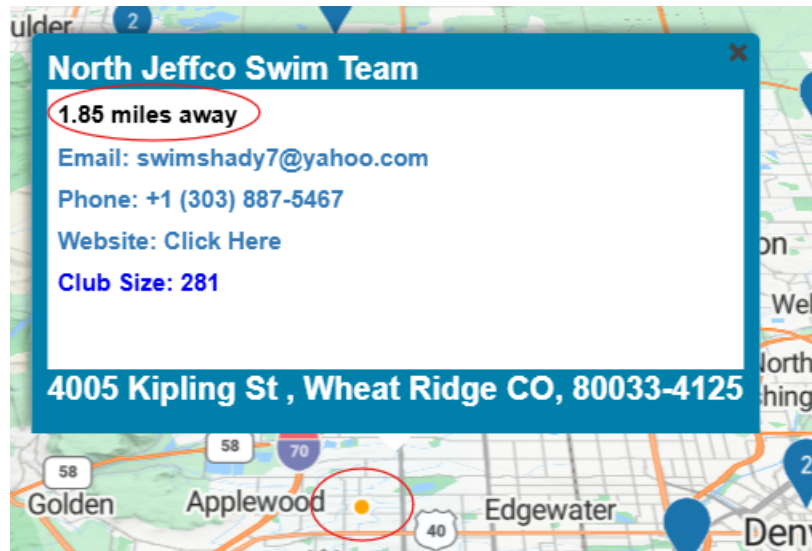

- Pins are initially clustered by zoom level and show the number of facilities under the pin. As the users zoom, facilities break out into their respective locations. If more than one club shares a facility, the numbers will persist, and the pins won't break out.
- Upon reaching a certain zoom level, the user will see a list of clubs on the right sidebar that correspond with the pins currently in the field of view.
  - Each list entry will show club name, facility name and the facilities' short address. There are also images representing SafeSport Recognition level and Club Excellence level if applicable:

<b>North Jeffco Swim Team</b> Veterans Memorial Aquatic Center Thornton, CO 80602	
<b>Elevation Athletics</b> Veterans Memorial Aquatic Center Thornton, CO 80602	
<b>Front Range Barracudas</b> Veterans Memorial Aquatic Center Thornton, CO 80602	 

- Clicking the list entry will show a popup in the map that shows club information and links.

- Users can also click/press the pins to get the club info popup.
- The gold dot on the map represents the searched address (or the geographic center of the zip code if only a zip code is entered) or the center of the map if no location is specified. The popup will display milage from this spot:

- In the mobile view, there is a 'Hide Filters' button that toggles the filter visibility to maximize the map view.
