

U.S. OLYMPIC TEAM TRIALS

SWIMMING, JUNE 15-23, 2024 • INDIANAPOLIS, IN

presented by *Lilly*

POOL FAST FACTS

- 78,000 sq ft of decking
- 2,000 sheets of plywood
- 480 LED boards to create the center-hung scoreboard, which is 20-times the size of the one used in the 2020(1) Trials
- First of its kind 70' tall vertical digital board for athlete entrance
- 4 high-speed cameras to film the finish at 100 frames per second, hung 4 stories high above the pool. This the highest these cameras have ever been placed in a pool in North America.
- 60 semi-trucks (53') used to load in
- 4 weeks to construct two 50m pools and one 25m pool inside Lucas Oil Stadium
- 8,000 hours invested to construct the pool shells and accessories
- 55 tons of stainless steel components
- 1.8 million gallons of water to fill the pools
 - Water sourced from White River, cleaned of impurities, treated for competition
 - At end of competition, water is again cleaned of impurities and sent back to White River
 - Citizens Energy Group and Bulleit Frontier Whiskey made this sustainability story possible, alongside Lucas Oil Stadium, Spear Corporation, Dodd Technologies, and Myrtha Pools
- 100 hp of pump capacity capable of moving more than 8,500 gallons per minute
- 5,000 linear feet of piping
- Almost 1500 bolted connections for assembly
- 40,000 SF of membrane
- 1,175 meters of floating lane ropes
- 3 Years of planning, design and preparation
- Integrating the efforts of over a dozen different firms and entities
- Pools will be disassembled and off to their permanent homes within 5 days post-event
 - Competition Pool is staying in Indiana (Fort Wayne)
 - Warm Up Pools are going to the Cayman Islands
